

FAASTeam, EA-63 FSDO presents:

Flying the New York SFRA (Special Flight Rules Area)

Flying the NY SFRA is an effective way to transition the New York Metropolitan area and is also an awe-filled scenic flight. However, the risks are numerous and the flight could become awful, rather than awe-filled. This seminar presents all the rules, hazards and risks, and then shows how to fly the route safely. Learn all the important, as well as mandated, reporting points, the difference between "transient" and "local" altitudes, where and how the helicopters operate, the proper frequencies to use along with suggested proper phraseology. The knowledge gained from this seminar will allow you to fly the corridor safely and with reduced risk to all aircraft in the airspace. Learn everything you need to know. Click on the link below and register TODAY.

Directions: See the attachment for fly in details. From Route 7 in Great Barrington, MA, travel west on Rt. 23, turn west on Rt. 71. The airport is approximately one mile on the right.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
